

Pythia Digital LLC

Veteran-Owned Data, AI & Automation Engineering · christian@pythiadigital.com · pythiadigital.com

COMPANY SNAPSHOT

Business type	Arizona LLC · Small Business
Socioeconomic status	Service-Disabled Veteran-Owned Small Business — SBA VetCert application in progress (owner: 100% P&T service-disabled veteran); decision expected Q1 FY27
UEI / CAGE	Pending — SAM.gov registration in progress
Primary NAICS	541511, 541512, 541519, 518210, 541611, 541690, 541910
PSC families	D3xx (IT & telecom services), 7A20 (software), R425, R699
Founded / leadership	Founder-led; principal is a senior data scientist with 8+ years across data engineering, ML, and full-stack delivery

CORE COMPETENCIES

- **AI / Machine Learning engineering** — LLM-based applications, natural-language search and document intelligence, predictive analytics, model evaluation and MLOps.
- **Data engineering** — pipelines and ETL, data warehousing, data quality/governance, large-scale ingestion (public-records pipelines processing millions of rows nightly).
- **Infrastructure & process automation** — infrastructure-as-code, CI/CD, scripted operations, monitoring/alerting, legacy-process automation and technical-debt reduction.
- **Analytics, dashboards & reporting** — decision-support dashboards, scored ranking models, executive reporting; Section 508-conscious web delivery.
- **Full-stack web engineering** — modern web applications and APIs (TypeScript/Python), secure server-side integrations.

DIFFERENTIATORS

- **AI-leveraged delivery model:** senior-engineer-led, automation-first — small-team pricing at large-team throughput.
- **Builders, not body-shop:** we ship working software products commercially; federal work gets the same product discipline (TDD, CI, documented handoffs).
- **We use our own analytics:** built a federal-market intelligence platform (USASpending/SAM.gov-scale ingestion, competition modeling) in-house — evidence of exactly the data-engineering capability we sell.
- **Veteran-owned and mission-literate:** the owner is a 100% P&T disabled veteran; VA mission familiarity is personal, not theoretical.

REPRESENTATIVE EXPERIENCE (COMMERCIAL)

- **Breaching Technologies, Inc. (US manufacturer):** federal market analysis — USASpending award mining and channel/distributor intelligence with verified UEI-level provenance, delivered as an actionable tiered prospect report. (*Reference available.*)
- **Federal-market intelligence platform (internal product):** nightly multi-GB public-data ingestion, competition-thinness scoring across 3,000+ market cells, automated opportunity monitoring — Python, SQLite, fully tested CLI tooling.
- **Client product builds (live, in production; references available):** annuity-atlas.com · fiduciarycheck.com · ethicalmo.com · buylo.app — web/data products delivered end-to-end for independent clients under the same senior-led, AI-leveraged delivery model offered here.

CONTRACT VEHICLES & ORDERING

Open-market and GPC/micro-purchase friendly (fixed-price digital deliverables under \$10,000). GSA MAS: planned FY27. Subcontracting/teaming: actively partnering with primes carrying SDVOSB subcontracting goals.
